DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1 and 4 are rejected under 35 U.S.C. 102(a) as being anticipated by applicant's admitted prior art (pages 1-4; and Figs. 1-2).

The prior art discloses a method for calculating a movement value of an optical mouse comprising the steps of: calculating a movement value, wherein the step of calculating the movement value selects a reference frame (page 3, lines 1-4), setting a reference area from the reference frame (12a, Fig. 2), and finds a correlation between a current input frame and the reference area of the reference frame (page 3), and resetting a reference area, wherein the step of resetting the reference area sets a new reference area (page 3, lines 17-20) to which the reference area of the reference frame is moved by considering the movement value calculated in the step of calculating the movement value (13a, Fig. 1). The admitted prior art inherently teaches adjusting a reference frame update speed based on a movement speed of the optical mouse so that the reference frame can be updated properly.

Application/Control Number: 10/705,711 Page 3

Art Unit: 2629

3. Claims 9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in view of Crane et al. (6664948).

Regarding to claim 9, the admitted prior art discloses an optical mouse comprising: an image sensor (3, Fig. 1) that obtains a surface image of a sample frame and outputs the surface image in pixel; and an image data processor that finds a correlation between a sample frame and the reference area of a reference frame to calculate a movement value and sets a new reference area to which the reference area of the reference frame is moved by considering the calculated movement value (pages 3-4).

The admitted prior art does not disclose an A/D converter for converting the output to a digital signal.

Crane, in the same input field, discloses connecting an A/D converter (90, Fig. 3) to an image sensor to convert image sensor output to a digital signal.

It would have been obvious to one of ordinary skill in the art to use Crane's A/D converter to convert the output of the image sensor of the admitted prior art so that the output of the image sensor can be converted to digital signal.

Regarding to claim 12, the admitted prior art further teaches updating a first frame (reference frame 12a, Fig. 2) and second frame (current frame 13aa, Fig. 2), and inherently teaches adjusting a reference frame update speed based on a movement speed of the optical mouse so that the reference frame can be updated properly.

Allowable Subject Matter

Application/Control Number: 10/705,711 Page 4

Art Unit: 2629

4. Claims 2-3, 5-8, 10-11, and 13-14 are objected to as being dependent upon a

rejected base claim, but would be allowable if rewritten in independent form including all

of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dennis-Doon Chow whose telephone number is 571-

272-7767. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Sumati Lefkowitz can be reached on 571-272-3638. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
